**DETAILED ACTION**  
***Specification***

1. The substitute specification filed 2-13-06 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: no marked up version has been received, as stated on page 6 of Applicant's remarks of 2-13-06.
2. The disclosure is objected to because of the following informalities: The specification does not clearly describe how the claimed invention works. Namely, how a 'new program is written'. The computer program is initially written and based on inputted values, the grinding apparatus performs a given process, but this is not writing a new program. There is insufficient description and method steps that define this function and how it is obtained. The phrase 'writes a new program' is used throughout the specification. For instance, on page 7 of the specification, it states. 'Disclosed is a computer controlled grinding and dressing machine which can write (nearly instantaneously by the operator) its own computer programs....' This is confusing in itself. Does the operator write the program or the machine? It further states ...'WITH INPUT OF SPECIFIC DATA'. Thus, the computer controlled machine is not actually 'writing a new program' but taking data input to perform a 'pre-written program' to obtain a certain finished product. Page 11, line 26 of the original specification is unclear. What does 'indicating' refer to? 'indicting' of what? What does 'having part repeats within millionths' mean?

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3723

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, what is a part profile icon? Is this a desired profile of the finished workpiece? What are 'value increment parameters'? parameters of what?

#### **Claim Rejections - 35 USC § 102**

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language.

5. Claims 12-14 is rejected under 35 U.S.C. 102(e) as being anticipated by Maack-5,766,057.

Maack discloses a centerless grinding machine with grinding wheel and regulating wheel dressers (32,39), wherein the dressing and grinding processes are carried out by a CNC or PLC (15) which has input means, display means, and

compilation means for carrying out intended program based on the input, which is a 'newly written' program as best understood, dependent on input parameter. The wheels can be dressed before a grinding operation.

### ***Response to Arguments***

Applicant's arguments filed 8-14-06 have been fully considered but they are not persuasive.

It is unclear what the newly claimed 'part profile icon' is. It is also unclear what increment parameter values are. Maack discloses a CNC machine that has data input (15) to yield a desired finished workpiece.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
